DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5-12, 16-24, 28-32 and 40-44 are rejected under 35 U.S.C. 102(b) as being anticipated by CA 2166671 (Savoie).

Savoie discloses the claimed device as shown in the marked up figure below. As shown in Fig. 4, the conveying roller has helical ribs, is in the discharge opening and is not wider than the cutters.

Marked Up Fig. 10 of Savoie

Claim Rejections - 35 USC § 103

3. Claims 3-4, 14-15, 25-27 and 33-39 and 45-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Savoie in view of Schmitt et al. U.S. Pat. No. 5,433,064.

Savoie discloses the device described above. However, Savoie does not disclose any details of the crop cutting assembly including the use of impellers.

Art Unit: 3671

Like Savoie, Schmitt et al. discloses a crop header with a cutter assembly and a discharge opening. Unlike Savoie, Schmitt et al. discloses providing impellers above the cutters and between the cutters (embodiment of Fig. 16). This helps propel the cut material towards the discharge opening.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the cutter assembly of Savoie like the cutter assembly in Schmitt et al., including the impellers, in order to facilitate moving the cut material into the discharge opening.
